Optional agreements	Accelerated Death Benefit for Chronic Illness Agreement, Accelerated Death Benefit for Terminal Illness Agreement, Chronic Illness Access Agreement, Overloan Protection Agreement, Premium Deposit Account Agreement and Waiver of Premium Agreement

¹The benchmark premium is a monthly measure. The no-lapse guarantee value is based on actual premium paid and the monthly benchmark premium. Payments differing in amount or frequency from the monthly benchmark premium will result in a different no-lapse guarantee value potentially impacting whether or not the no-lapse guarantee is in effect.

²Uncapped indexed account participation rates are subject to change and may be less than 100%. This could have the impact of the indexed account credit being less than the change in the reference index.

The Indexed Universal Life Series is designed first and foremost to provide life insurance protection. While the interest crediting options are attractive for cash accumulation, the product should always be promoted to first meet the death benefit needs of families and businesses with cash accumulation as a secondary benefit. One cannot invest in an index.

Please keep in mind that the primary reason to purchase a life insurance product is the death benefit.

Life insurance products contain fees, such as mortality and expense charges (which may increase over time), and may contain restrictions, such as surrender charges. One could lose money in these products.

Policy loans and withdrawals may create an adverse tax result in the event of a lapse or policy surrender, and will reduce both the surrender value and death benefit. Withdrawals may be subject to taxation within the first fifteen years of the contract. Clients should consult their tax advisor when considering taking a policy loan or withdrawal.

Guarantees are based on the claims-paying ability of the issuing insurance company.

All indexed accounts available with the Indexed Universal Life Series employ a point-to-point interest crediting method with one-year index segments – except where noted – established monthly. Interest credits for any index segment may range from 0% up to the maximum for that segment. These policies guarantee that the total interest credited over the life of the policies will not be less than a 2.00% effective annual interest rate.

The performance of the underlying index may exceed the offered indexed growth caps. Interest crediting within these accounts will vary based on the movement of the investments within the underlying index. Should the index have 0% growth or decline, policy owners bear the risk that no Index credit will be given to the account.

¹ The “S&P 500 Index” is a product of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates (“SPDJ”) and, and has been licensed for use by Minnesota Life Insurance Company (Minnesota Life) and Securian Life Insurance Company (Securian Life).
